

Omnicia to Feature Integrated OmnieFile with Legal Imaging Technologies' Imaging Solutions

Omnicia, Inc. Enters into a Strategic Partnership with Legal Imaging Technologies, Inc. and Introduces Top-Notch Imaging Solutions to the Biopharmaceutical Market

SOUTH SAN FRANCISCO, CA., October 20, 2003 — Omnicia, a global provider of electronic submissions software and services to the biopharmaceutical industry, and Legal Imaging Technologies (LIT[®]), the leading provider of electronic document production services, today announced the formation of their strategic partnership. Omnicia and LIT[®] will integrate Omnicia's OmnieFile electronic submissions software with LIT[®]'s electronic document production, scanning, indexing and business records management services to provide a one-stop imaging solution for the biopharmaceutical industry. The partnership's solutions will be initially targeted to the West Coast where both companies are headquartered.

OmnieFile, Omnicia's modular software application that streamlines and expedites the compilation of electronic submissions, compliments LIT[®]'s state-of-the art imaging equipment and stellar electronic document production services in a way that will provide the industry with the electronic and legacy files it needs. These files, originating from paper, will become electronic documents with navigational and search capabilities, such as indexes, cross-references, bookmarks and text files through OCR.

"Finally, there is an excellent local alternative for electronically capturing and processing CRFs and legacy documents," said Reuben K. Jenkins, Omnicia's President and Chief Executive Officer. "No longer are small and medium-sized West Coast biopharmaceutical companies held hostage by expensive, distant consultants who charge not only for image capture, but also for travel, equipment, software and whatever other extra charges they can heap on. The tools we now offer mark a new era of competitiveness. And it goes without saying, that this is great news for companies wishing to outsource scanning, indexing, bookmarking, hyperlinking and further processing the electronic versions of their paper documents."

About Omnicia, Inc.

Founded in 2001, Omnicia, Inc. is a privately held global corporation dedicated to the development and delivery of software solutions and professional services that support drug development and regulatory submissions activities. The company addresses the electronic

regulatory submissions, business-to-government needs of the biopharmaceutical industry. Omnicia's worldwide headquarters are located in the heart of Biotech Bay, South San Francisco. For more information, call 650-588-2188, email pr@omniciainc.com, or visit www.omniciainc.com.

About Legal Imaging Technologies, Inc.

Legal Imaging Technologies, Inc. (LIT[®]) is a document management company providing on- and off-site scanning, electronic document conversions and management of business records. LIT[®] also provides document coding, optical character recognition (OCR) and consulting services. Since 1993, LIT[®] has been providing the most accurate and detailed document production services available on the West Coast.
